THURSDAY

30mins

FRIDAY

20mins

SATURDAY

Irish Life Dublin Half Marathon

SUNDAY

Rest

Irish Life Dublin Half Marathon Training Plan – Definitions

WARM UP

Warming up can help prevent injury & improve performance. Incorporate walking, strides & stretches such as lunges and leg swings into your pre--run routine.

COOL DOWN

Finish your run with a cool down walk. This relaxes your muscles and lowers your heart rate & breathing from our workout intensity.

REST DAY

Take a break and let your body recover. Feel free to go for a walk/cycle or even do a strength workout if your body feels good. Use this time to get stretching/foam rolling to get ready for the next run/walk.

FARTLEK

This is simple speed-work. After a warm up, run fast for as far as you can, take as much time as needed to recover & then go again. To help, pick a point up ahead, run to it and then pick another point up ahead & recover for the specified time. Repeat for the specified time & then cool down.

TEMPO

A pace you should be able to maintain for a longer period if needed.

FAST

Is a harder pace but not totally all out.
